Preface

We are eternally grateful to Allah (SWT), the Almighty, for Blessing us the knowledge, strength, and purpose to carry out and manage this important study. All praise and thanks are due to the Lord of the worlds, Creator of all things, for providing us with the means to complete this work. Also, we extended our heartfelt salutation to the most honorable and for whom Allah created the universe, Prophet Muhammad (P, B, U, H).

Our sincere thanks go to all teachers who guided us and supported us in managing this research in the best way, such as teacher Shafiq “Assir” and other teachers. We pay our gratitude to Mr. Faizulbari “Zaheed” (Founder of Saba Educational Academy) for providing best education, research facilities, and resources to accomplish our research. Also, we would like to express our sincere gratitude to our respected supervisor, Teacher. Abdul Musawer “Sadid”, for his selfless guidance, patience, motivation, during the whole process. His guidance helped us throughout the time of research and writing this research. We are whole heartedly thankful to our family, especially our beloved parents, brothers, and sisters, who supported us financially and motivationally and encouraged us. We are also thankful to the academy's principal and colleagues,

who have generally shared their experience, provided precious perceptions, responses, and comments, and particularly challenged us to strengthen our mental capacity. Your contributions, comprehension, and coordination have helped determine the wisdom and quality of this research.

To wrap up, we sincerely thank all the students who participated in this study. This work would not have been possible without your cooperation and willingness to share your experiences. Your participation in this research and your support makes us deeply grateful to you. We hope that this research will positively state the Role of English Listening on Speaking Fluency.

Abstract

This study investigated the Role of English Listening on English Speaking Fluency. This research was done to identify the role of listening to English (podcasts, interviews, conversation) in speaking fluency. We used Quantitative method and for Collecting Data Questionnaire was used. The data was collected through the questionnaires from Afghan EFL learners, including male and female participants. The data was analyzed by Statistics SPSS (Statistical Package for the Social Sciences). English listening plays a foundational role in developing speaking fluency. Daily Presentation to English Allow you to a natural speaking. Listening is one of the four major language skills. Listening to English more frequently enhances speaking skills and boosts learners' confidence. Frequent listening leads to changes in speakers' accents and improves learners (vocabulary and phrasing). Listening is a very good method for speaking fluently.

Key words: English listening, speaking fluently, listening.

CHAPTER ONE

Introduction

As researchers have explored this issue, listening plays an important role in learning English and achieving fluency. It suggests listening to English audio materials, such as conversations and songs. Brumfit (1984) focused on methods that promote the natural acquisition of English fluency. Furthermore, improving these skills requires daily practice and the use of suitable resources. Besides that, listening helps us understand accents, words, sounds, and phrases. The authors emphasize the importance of being active while listening, such as taking notes and summarizing, which helps learners build better language skills.

When a person speaks English fluently, it means that the individual can communicate without stammering, unnecessary pauses, or loss of composure. This ability helps learners to increase their grammar and pronunciation. Speaking English fluently is a fundamental aspect of proficiency. Similarly, Chang and Millet (2014) and Renandya and Farrell (2011) have researched how extensive exposure to spoken English can facilitate the development of fluency.

In today's modern world, learning a language, especially English, is one of the main priorities for individuals who want to communicate with others. However, learning a language is not

an easy task. Listening is one of the four major language skills that learners must develop. This is particularly challenging in non-native countries where people do not have access to immediate feedback or a real conversational context. Given the importance of speaking and the goal of communicating in English, language learning depends on three conditions: exposure, opportunities, and practice.

This is especially crucial in the digital area we live in, where technology plays an important role in education. Overall, the study's conclusions could significantly influence the creation of more effective, theoretically supported language learning techniques. Teaching English as a spoken skill has always been a challenging task for language tutors, (McArthur, 2005). To teach speaking skills successfully, teachers must understand the factors that impact students' speaking abilities.

Students who learn English face major challenges when learning English. One of the most remarkable issues is the lack of a natural and interactive environment that enables them to master the language more easily. Learners need opportunities to express their thoughts and feelings and to experiment with language in a supportive atmosphere. Academic language is defined as the combination of skills and content knowledge necessary for successful academic performance at secondary and university levels. Thirusanku and Yunus (2014) reported that students in

Kuala Lumpur, an international city where English is spoken widely and fluently, achieve higher levels of proficiency compared to their counterparts studying English in less English-dominant settings.

Research Objective:

- 1) To explore the role of English listening on speaking fluency.
- 2) To identify the listening skills.

Research question:

- 1) What`s the role of English listening in speaking fluency?

CHAPTER TWO

Literature view

1): To explore the role of English listening on speaking fluency.

English is a cosmopolitan language and is frequently used to communicate with foreign countries and different nationalities. There are some pressing challenges in mastering English, one of them relates to listening skills. According to Machkova (2009), there are several types of difficulties in learning languages. Some obstacles include a lack of focus during English lessons, which prevents students from listening effectively and understanding what speakers are saying.

Gilakjani (2011) state that listening is an activity focused on identifying problems and solving them. Listening is the ability to comprehend what others are saying and what is considered a facilitating skill. According to Islam (2012), listening is an active process that involves predicting, guessing, or making supposition. It is a complex activity that requires interaction between prior knowledge and response to new information received. Griffiths (2008), Dawadi (2017), Alhaysony (2017), and Charoento (2017) emphasize that learners value diverse listening tactics and prefer listening in different ways to better understand a target language. However, learners often find listening difficult due to fear, uncertainty, or hesitation about making mistakes.

This study also explores the diversity of listening and speaking skills, as well as the tactics used by both learners and teachers to enhance language attainment. Techniques such as "listening and breaking down content" help students develop a deeper understanding of why they listen and the skills they can use to improve their abilities. An essential reason to pay attention while listening is to draw meaningful conclusions.

When students develop effective listening habits, they become skilled listeners. Songs are also a valuable tool for language learning, as they offer cultural insights. When learners use songs, they can focus on understanding the lyrics and idioms, which introduce new vocabulary. Songs not only aid learning but also make the process entertaining. Motivation, often overlooked, is a key factor in language acquisition, and incorporating songs into lessons can enhance students' engagement and enjoyment of studying a foreign language.

2. Listening Skill

Definition of Listening Skill:

Several researchers have defined listening skills. Najrana (2018) states that listening is an active process involving understanding what we hear. It is a skill to comprehend information and strong arguments. Hwaider (2017) asserts that without listening skills, people cannot grasp the messages being conveyed. Listening is further explained as a cognitive process without any immediately observable results, as it often seems passive in nature.

2.1. Types of Listening Skills:

Listening is a crucial and fundamental skill among the four major language skills. According to Johnson (2021), different types of listening are shaped by the growth of individuals. Some examples include:

- | | |
|-----------------------|-------------------------|
| 1: Value Listening | 2: Critical Listening |
| 3: Optional Listening | 4: Protective Listening |
| 5: Cheating Listening | 6: Accidental Listening |
| 7: Smart Listening | 8: Attentive Listening |

Nagendra (2014) also categorized the types of listening and people engage in to be an active and efficient listener, one must understand the purpose of listening and determine the most appropriate type of listening to adopt.

Chapter Three

Methodology

In this study, we used from Quantitative method and for collecting Data by Questioner because it's a best way for collecting Data. And also, the other Reason for Quantitative Method to Examine the role of English listening on Improving speaking fluency Among language learners. And also, it was applied to understand How students frequently engage with Listening and how they are confidence in speaking.

Participants

This study 150 participants take part included (Male and Female). And We had different age that started from 10-30. And we had different language included (Dari, Pashto and Uzbek). And we used Random Sampling, Random sampling was insured that every student Had an equal chance of being selected.

Problem statement

this study was important to address the lack of speaking assessment in (EFL) Learners which prevents students from developing strong communication skill: the main issue is that students are assed only: Reading, Writing, Vocabulary, and

Grammar. And also, students don't Motivated to work on their Listening and speaking skills.

Data Collection and analyzing

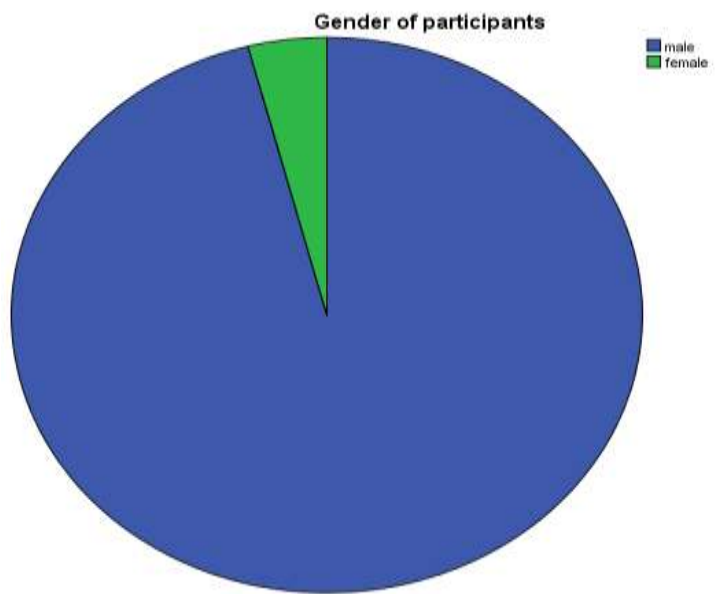

Our Research was directed using from questionnaire which can be found in Data analyzing, because questionnaire is the best way for collecting Data and helps us in order to find the achievements. In our questionnaire that was 20 Question. We distributed our Questionnaire in different English academy with a full instruction and explanation in their English classes. Question on questionnaire focused on student habits or material: - for example, Songs, Video, Podcasts. And then for analyzing our Data, we used from Microsoft Excel to analyze our Data because it's an easy app. And then the information put into an Excel file, then we analyze information by a statistical app called (SPSS) to analyze the research question.

Limitations

- 1:** Having fewer female participants
- 2:** Having less time

Table 1: Statistical Analysis of Students’ Gender

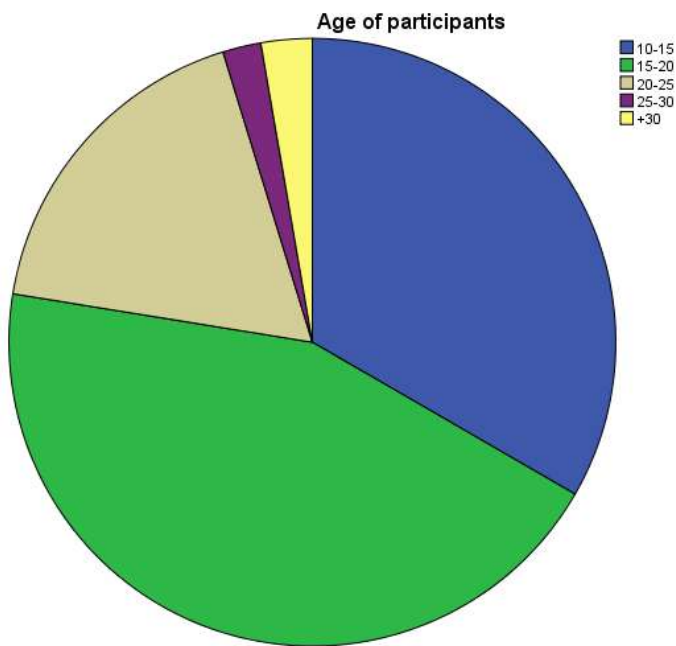

Gender of participants					
		Frequency	Percent	Valid Percent	Cumulative Percent
Valid	male	143	95.3	96.0	96.0
	female	6	4.0	4.0	100.0
	Total	149	99.3	100.0	
Missing	Unknown	1	.7		
Total		150	100.0		

As Table One demonstrates, the current study had 150 participants, both male and female. The highest number of subjects was male, with 143, which represents 95.3% of the subjects. The female respondents were 6, which represents 4.0% of the subjects.

Table 2: Demographic Analysis of Students’ Age Variables

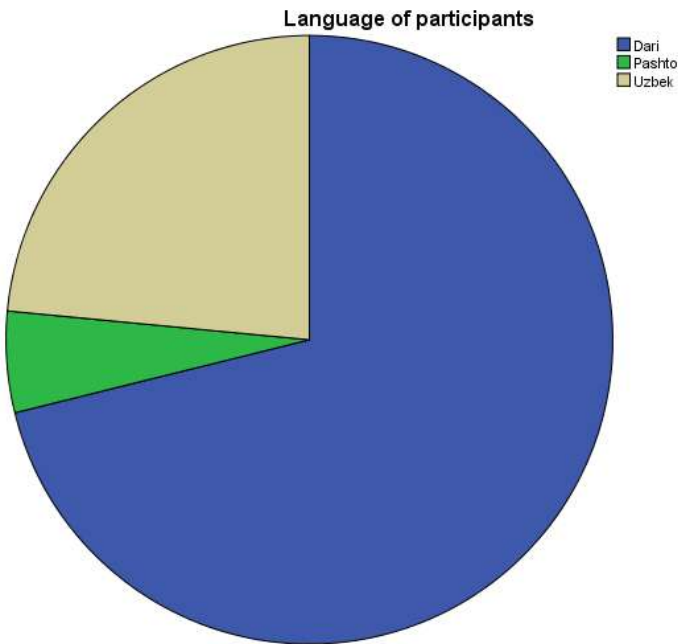

Age of participants					
		Frequency	Percent	Valid Percent	Cumulative Percent
Valid	10-15	49	32.7	33.3	33.3
	15-20	65	43.3	44.2	77.6
	20-25	26	17.3	17.7	95.2
	25-30	3	2.0	2.0	97.3
	+30	4	2.7	2.7	100.0
	Total	147	98.0	100.0	
Missing	Unknown	3	2.0		
Total		150	100.0		

The age demographic analysis of Table 2 showed that the highest percentage, 43.3%, is formed of the participants aged between 15-20. And 32.7 % of them were aged 10-15. Participants between the ages of 20-25 formed 17.3% of the age variables.

Table 3: Demographic Analysis of Students’ Language Variables

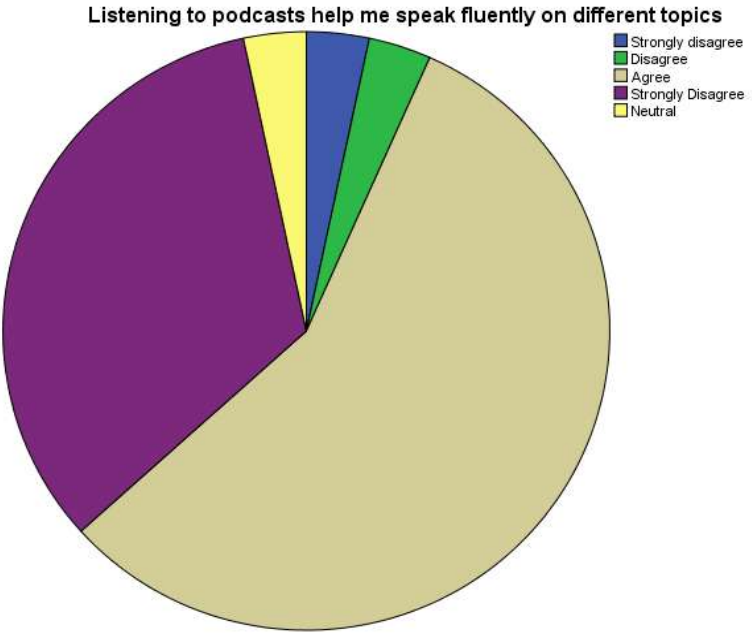

Language of participants					
		Frequency	Percent	Valid Percent	Cumulative Percent
Valid	Dari	106	70.7	71.1	71.1
	Pashto	8	5.3	5.4	76.5
	Uzbek	35	23.3	23.5	100.0
	Total	149	99.3	100.0	
Missing	unknown	1	.7		
Total		150	100.0		

The above table is drawn to demonstrate the quantities of the respondents’ first language as follows. Dari speakers were the highest number, which forms 70.7 %. Uzbek speakers were the second highest that forming 23.3 % of the first language speakers. Pashto speakers form 5.3 % of the total speakers.

Question 1: Listening to podcasts helps me speak fluently on different topics.

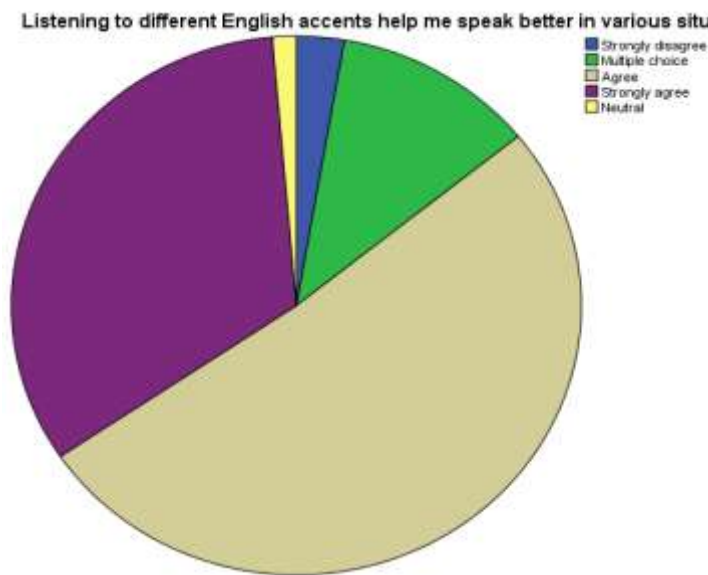

Listening to podcasts helps me speak fluently on different topics.					
		Frequency	Percent	Valid Percent	Cumulative Percent
Valid	Strongly disagree	5	3.3	3.3	3.3
	Disagree	5	3.3	3.3	6.7
	Agree	85	56.7	56.7	63.3
	Strongly Disagree	50	33.3	33.3	96.7
	Neutral	5	3.3	3.3	100.0
	Total	150	100.0	100.0	

The above graph demonstrates that almost 56.7% of the participants are positive and they agreed, And around 33.3% of them strongly agreed that **Listening to podcasts helps me speak fluently on different topics.**

Question 2: Listening to different English accents helps me speak better in various situations.

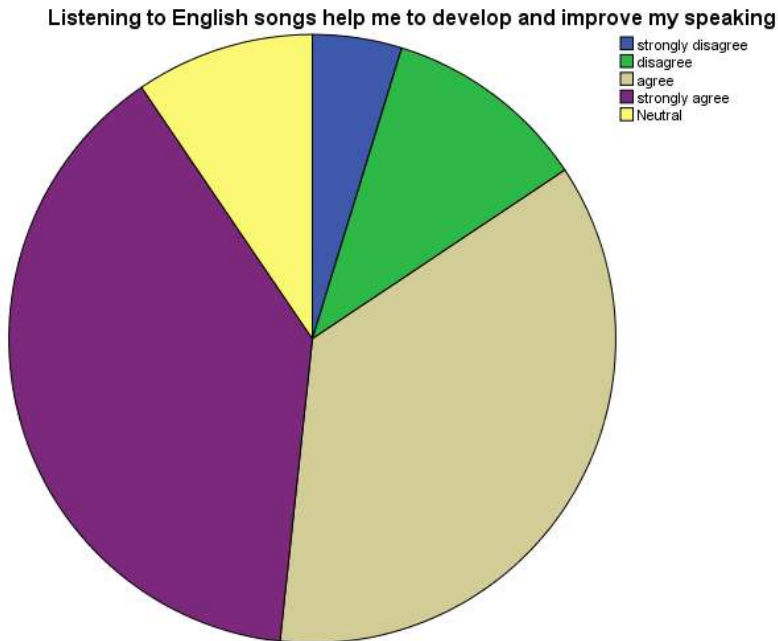

Listening to different English accents helps me speak better in various situations.					
		Frequency	Percent	Valid Percent	Cumulative Percent
Valid	Strongly disagree	4	2.7	2.7	2.7
	Multiple choice	17	11.3	11.5	14.2
	Agree	76	50.7	51.4	65.5
	Strongly agree	49	32.7	33.1	98.6
	Neutral	2	1.3	1.4	100.0
	Total	148	98.7	100.0	
Missing	Multiple choice	1	.7		
	unknown	1	.7		
	Total	2	1.3		
Total		150	100.0		

Nearly 50.7% of the respondents ‘attitude that activities is positive and agreed. And about 32.7% of them strongly Expressed their ideas that **Listening to different English accents helps me speak better in various situations.**

Question 3: Listening to English songs helps me develop and improve my speaking.

Listening to English songs helps me develop and improve my speaking.					
		Frequency	Percent	Valid Percent	Cumulative Percent
Valid	strongly disagree	7	4.7	4.8	4.8
	disagree	16	10.7	10.9	15.6
	agree	53	35.3	36.1	51.7
	strongly agree	57	38.0	38.8	90.5
	Neutral	14	9.3	9.5	100.0
	Total Multiple choice	147	98.0	100.0	
Missing		3	2.0		
Total		150	100.0		

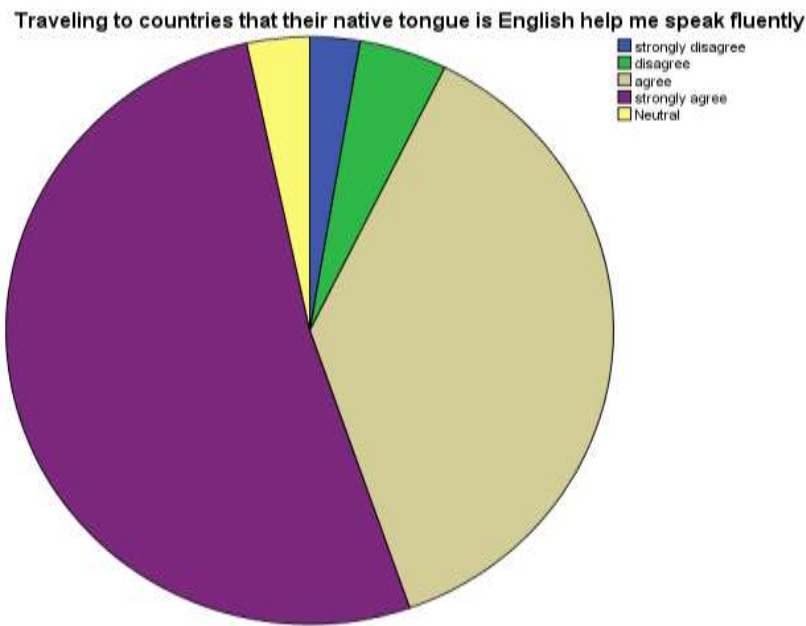

Almost 35.3% of guidance and instruction is positive and agreed **Listening to English songs helps me develop and improve my speaking**, and 38.0% of them strongly their ideas with this topic. But 10.7% were disagree with this section.

Question 4: Traveling to countries that their native tongue is English helps me speak fluently.

Traveling to countries where their native tongue is English helps me speak fluently.

		Frequency	Percent	Valid Percent	Cumulative Percent
Valid	strongly disagree	4	2.7	2.7	2.7
	disagree	7	4.7	4.7	7.3
	agree	56	37.3	37.3	44.7
	strongly agree	78	52.0	52.0	96.7
	Neutral	5	3.3	3.3	100.0
	Total	150	100.0	100.0	

About 37.3% of the respondents agreed and expressed their ideas that **Traveling to countries that their native tongue is English helps me speak fluently**. And 52% of them strongly agreed about this section.

Question 5: Effective and enjoyable listening will affect my speaking fluency.

Effective and enjoyable listening will affect my speaking fluency.					
		Frequency	Percent	Valid Percent	Cumulative Percent
Valid	strongly disagree	3	2.0	2.0	2.0
	disagree	11	7.3	7.4	9.4
	agree	84	56.0	56.4	65.8
	strongly agree	45	30.0	30.2	96.0
	neutral	6	4.0	4.0	100.0
	Total	149	99.3	100.0	
Missing	unknown	1	.7		
Total		150	100.0		

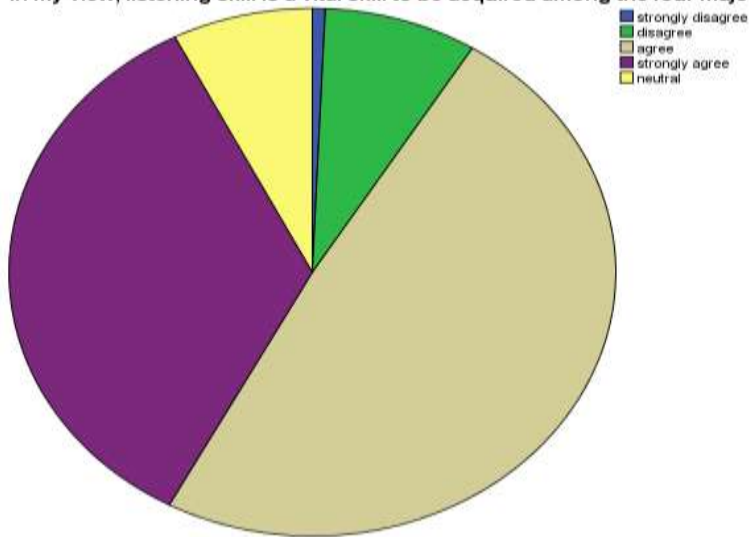

56% of the undergraduate students agreed that **Effective and enjoyable listening**, and 30% of the students strongly expressed their views in this regard.

Question 6: In my view, listening skill is a vital skill to be acquired among the four major skills.

In my view, listening skill is a vital skill to be acquired among the four major skills					
		Frequency	Percent	Valid Percent	Cumulative Percent
Valid	strongly disagree	1	.7	.7	.7
	disagree	12	8.0	8.2	8.8
	agree	72	48.0	49.0	57.8
	strongly agree	51	34.0	34.7	92.5
	neutral	11	7.3	7.5	100.0
	Total	147	98.0	100.0	
Missing	Multiple choice	1	.7		
	unknown	2	1.3		
	Total	3	2.0		
Total		150	100.0		

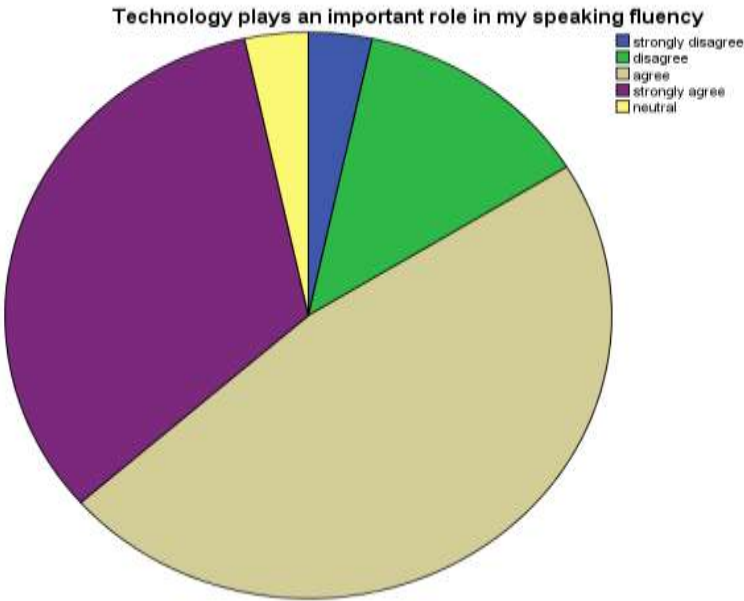

In my view, listening skill is a vital skill to be acquired among the four major skills

Almost 48% of the subjects agreed that the **in my view, listening skill is a vital skill to be acquired among the four major skills.** and around 34% strongly agreed in this Regard.

Question 7: Technology plays an important role in my speaking fluency.

Technology plays an important role in my speaking fluency					
		Frequency	Percent	Valid Percent	Cumulative Percent
Valid	strongly disagree	5	3.3	3.4	3.4
	disagree	19	12.7	12.8	16.2
	agree	70	46.7	47.3	63.5
	strongly agree	49	32.7	33.1	96.6
	neutral	5	3.3	3.4	100.0
	Total	148	98.7	100.0	
Missing	unknown	2	1.3		
Total		150	100.0		

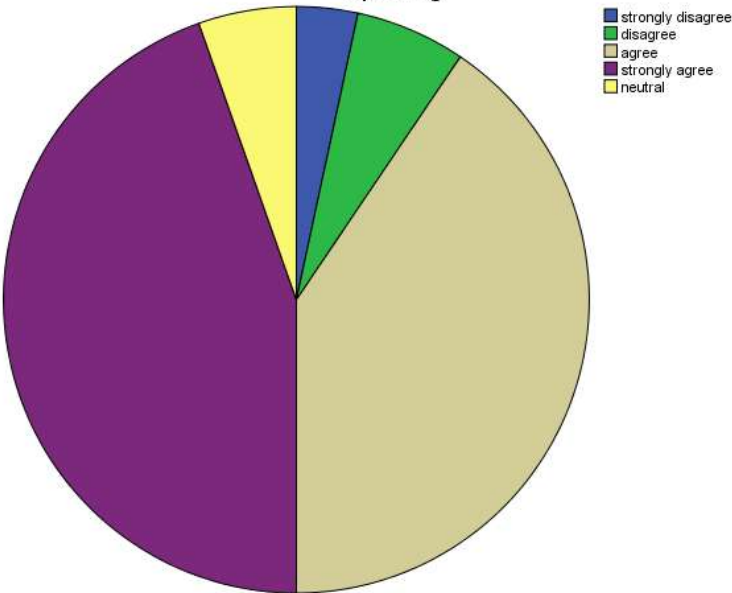

Almost 46.7% them expressed their views that **Technology plays an important role in my speaking fluency**. And 32.7% strongly agreed about this Regard.

Question 8: I think watching interviews with different people improves my understanding of speaking.

In think watching interviews with different people improves my understanding of speaking					
		Frequency	Percent	Valid Percent	Cumulative Percent
Valid	strongly disagree	5	3.3	3.4	3.4
	disagree	9	6.0	6.1	9.5
	agree	60	40.0	40.5	50.0
	strongly agree	66	44.0	44.6	94.6
	neutral	8	5.3	5.4	100.0
	Total	148	98.7	100.0	
Missing	multiple choice	2	1.3		
Total		150	100.0		

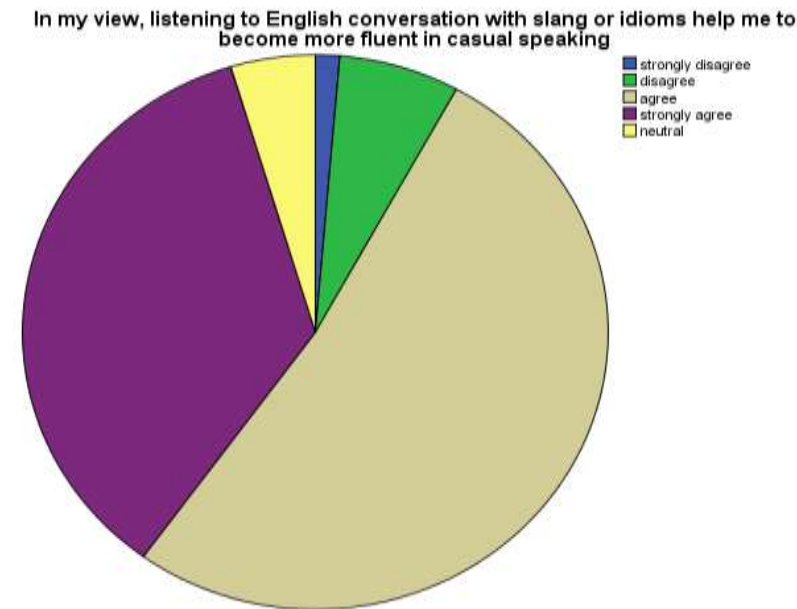

I think watching interviews with deferent people improve my understanding in speaking

Around 40% of the subjects believed and agreed that **I think watching interviews with different people improves my understanding of speaking**. while 44.6% of the participants' ideas were strongly positive in this regard.

Question 9: In my view, listening to English conversation with slang or idioms helps me to become more fluent in casual speaking.

In my view, listening to English conversation with slang or idioms helps me to become more fluent in casual speaking					
		Frequency	Percent	Valid Percent	Cumulative Percent
Valid	strongly disagree	2	1.3	1.3	1.3
	disagree	10	6.7	6.7	8.0
	agree	78	52.0	52.0	60.0
	strongly agree	53	35.3	35.3	95.3
	neutral	7	4.7	4.7	100.0
	Total	150	100.0	100.0	

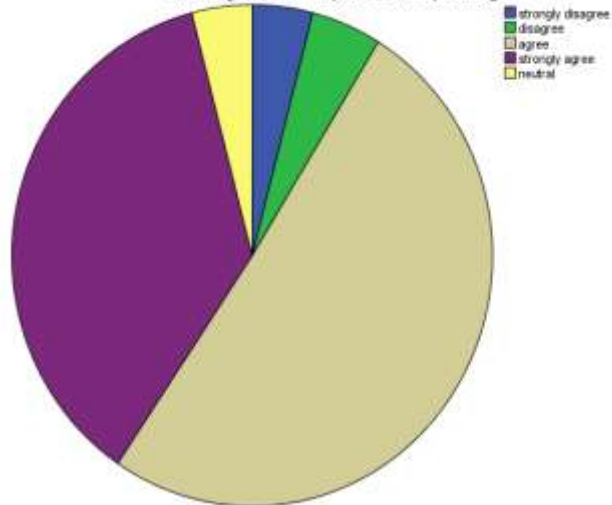

About 52% of the undergraduates’ beliefs are positive and agree that the topics of, **listening to English conversation with slang or idioms helps them become more fluent in casual speaking**, whereas 35.3% of the participants strongly agreed that the topics meet their needs.

Question 10: I think listening to English content focused on vocabulary improves my fluency in using words and phrases in speaking.

I think listening to English content focused on vocabulary improves my fluency in using words and phrases in speaking					
		Frequency	Percent	Valid Percent	Cumulative Percent
Valid	strongly disagree	6	4.0	4.1	4.1
	disagree	7	4.7	4.7	8.8
	agree	75	50.0	50.7	59.5
	strongly agree	54	36.0	36.5	95.9
	neutral	6	4.0	4.1	100.0
	Total	148	98.7	100.0	
Missing	multiple choice	1	.7		
	unknown	1	.7		
	Total	2	1.3		
Total		150	100.0		

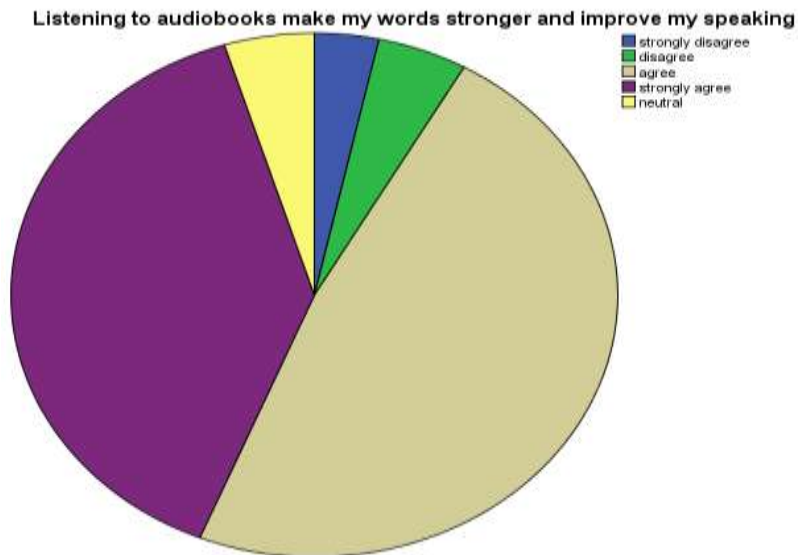

I think listening to English content focused on vocabulary improves my fluency in using words and phrases in speaking

Regarding whether the contents are based on the students’ preference, about 50.7% agreed. Meanwhile, around 36% strongly expressed their views that the contents are based on their preference.

Question 11: Listening to audiobooks makes my words stronger and improves my speaking.

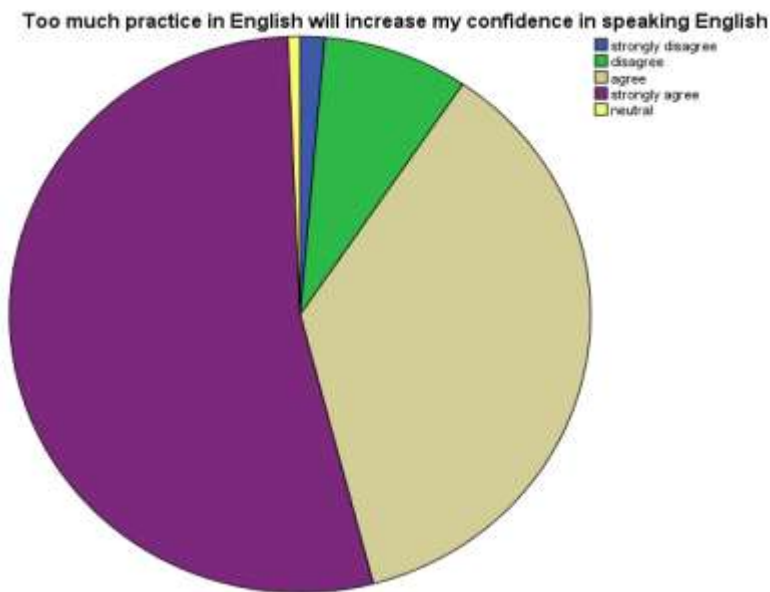

Listening to audiobooks makes my words stronger and improves my speaking		Frequency	Percent	Valid Percent	Cumulative Percent
Valid	strongly disagree	5	3.3	3.4	3.4
	disagree	7	4.7	4.8	8.2
	agree	70	46.7	47.9	56.2
	strongly agree	57	38.0	39.0	95.2
	neutral	7	4.7	4.8	100.0
	Total	146	97.3	100.0	
Missing	multiple choice	2	1.3		
	unknown	2	1.3		
	Total	4	2.7		
Total		150	100.0		

As this statement showed that 46.7% of the participants agreed and expressed their satisfaction Listening to audiobooks makes my words stronger and improves my speaking.

Question 12: Too much practice in English will increase my confidence in speaking English.

Too much practice in English will increase my confidence in speaking English					
		Frequency	Percent	Valid Percent	Cumulative Percent
Valid	strongly disagree	2	1.3	1.4	1.4
	disagree	12	8.0	8.1	9.5
	agree	54	36.0	36.5	45.9
	strongly agree	79	52.7	53.4	99.3
	neutral	1	.7	.7	100.0
Total		148	98.7	100.0	
Missing	unknown	2	1.3		
Total		150	100.0		

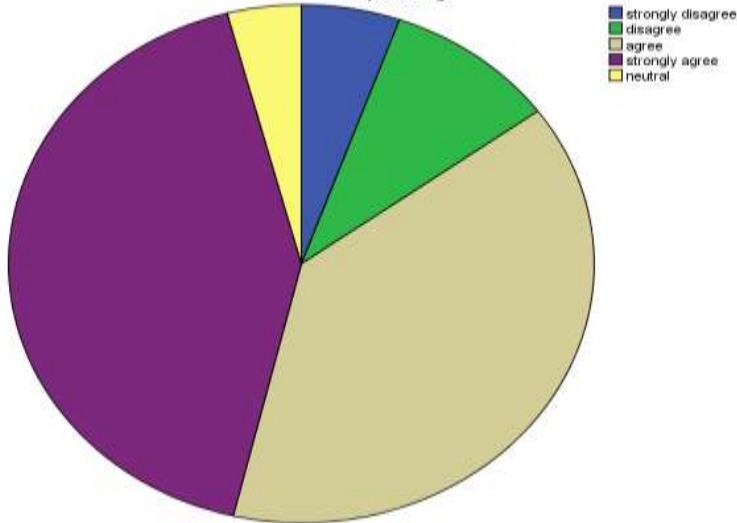

It can be drawn from statement 12 about 36% of the subjects expressed their dissatisfaction with **Too much practice in English will increase my confidence in speaking English.**

Question 13: Listening to English movies with Persian subtitles will help my understanding of speaking.

Listening to English movies with Persian subtitles will help my understanding of speaking					
		Frequency	Percent	Valid Percent	Cumulative Percent
Valid	strongly disagree	8	5.3	5.4	5.4
	disagree	14	9.3	9.5	15.0
	agree	57	38.0	38.8	53.7
	strongly agree	62	41.3	42.2	95.9
	neutral	6	4.0	4.1	100.0
	Total	147	98.0	100.0	
Missing	multiple choice	2	1.3		
	unknown	1	.7		
	Total	3	2.0		
Total		150	100.0		

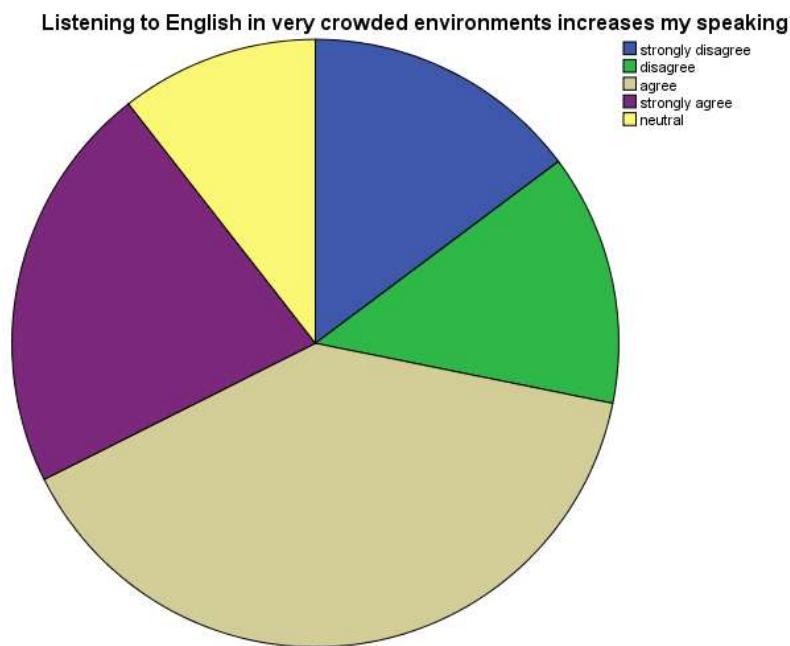

Listening to English movies with Persian subtitles will help my understanding in speaking

Nearly, 38% of the participants agreed that **listening to English movies with Persian subtitles**. about 41.3% of them strongly agreed in this regard.

Question 14: Listening to English in very crowded environments increases my speaking.

Listening to English in very crowded environments increases my speaking.					
		Frequency	Percent	Valid Percent	Cumulative Percent
Valid	strongly disagree	21	14.0	14.8	14.8
	disagree	19	12.7	13.4	28.2
	agree	56	37.3	39.4	67.6
	strongly agree	31	20.7	21.8	89.4
	neutral	15	10.0	10.6	100.0
	Total	142	94.7	100.0	
Missing	unknown	8	5.3		
Total		150	100.0		

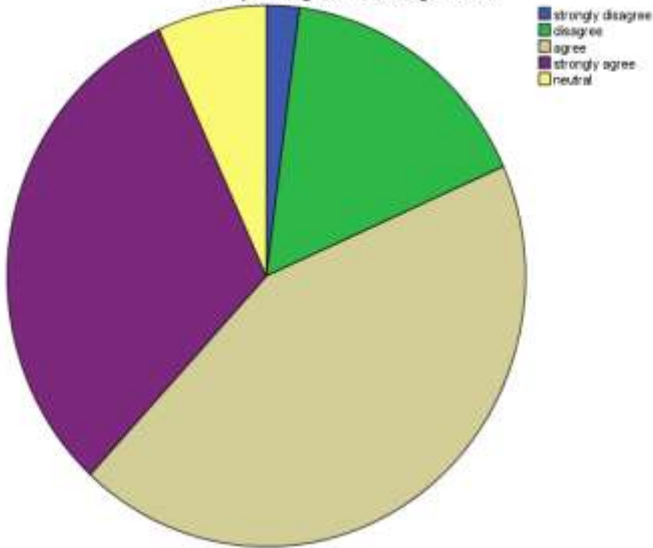

Almost 37.3% agreed that their feelings regarding **Listening to English in very crowded environments increases my speaking** are positive, whereas 20.7% of them strongly expressed their positive and feelings.

Question 15: In my view listening to English videos plays an important role in raising the side of speaking than reading a book.

		Frequency	Percent	Valid Percent	Cumulative Percent
Valid	strongly disagree	3	2.0	2.0	2.0
	disagree	24	16.0	16.3	18.4
	agree	64	42.7	43.5	61.9
	strongly agree	46	30.7	31.3	93.2
	neutral	10	6.7	6.8	100.0
	Total	147	98.0	100.0	
Missing	multiple choice	1	.7		
	unknown	2	1.3		
	Total	3	2.0		
Total		150	100.0		

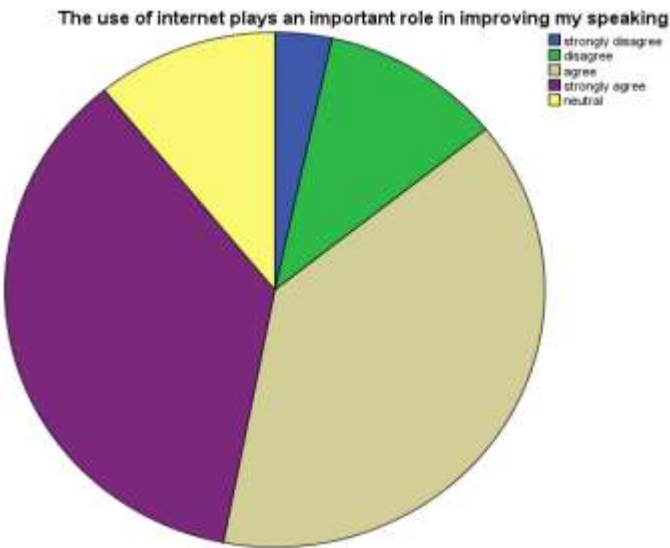

In my view listening to English videos plays an important role in raising the side of speaking than reading a book.

In this regard nearly 42.7% of agreed that **listening to English videos plays an important role in rising speaking than reading a book.** And about 30.7% of them were strongly agreed about this issue.

Question16: The use of internet plays an important role in improving my speaking.

		Frequency	Percent	Valid Percent	Cumulative Percent
Valid	strongly disagree	3	2.0	2.0	2.0
	disagree	24	16.0	16.3	18.4
	agree	64	42.7	43.5	61.9
	strongly agree	46	30.7	31.3	93.2
	neutral	10	6.7	6.8	100.0
	Total	147	98.0	100.0	
Missing	multiple choice	1	.7		
	unknown	2	1.3		
	Total	3	2.0		
Total		150	100.0		

Nearly 42.7% Agreed that **the use of internet plays an important role in improving my speaking**. 30.7% strongly agreed in this regard.

Question 17: I think listening and speaking are related to each other.

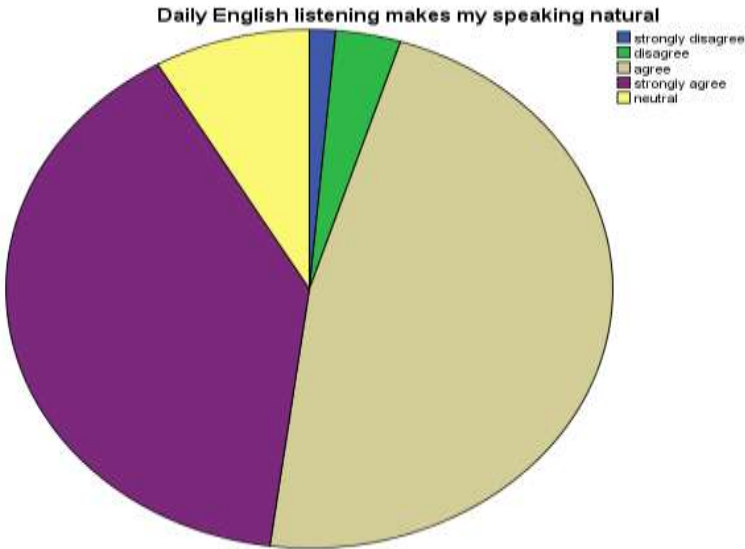

I think listening and speaking are related to each other.					
		Frequency	Percent	Valid Percent	Cumulative Percent
Valid	strongly disagree	6	4.0	4.3	4.3
	disagree	13	8.7	9.2	13.5
	agree	59	39.3	41.8	55.3
	strongly agree	52	34.7	36.9	92.2
	neutral	11	7.3	7.8	100.0
	Total	141	94.0	100.0	
Missing	multiple choice	2	1.3		
	unknown	7	4.7		
	Total	9	6.0		
Total		150	100.0		

Around 39% of the participants agreed that **I think listening and speaking are related to each other**, and about 34.7% strongly agreed and said that the curriculum contents in English literature are hard for them to learn.

Question 18: Daily English listening makes my speaking natural.

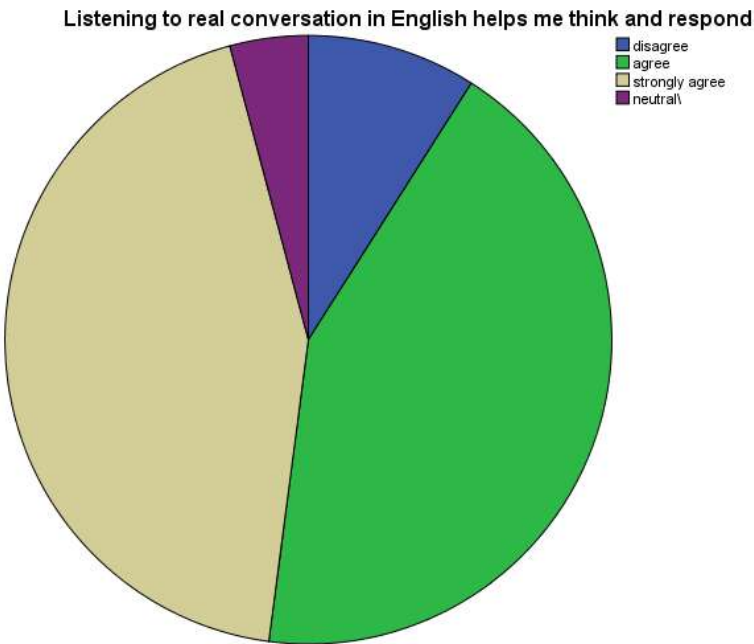

Daily English listening makes my speaking natural.					
		Frequency	Percent	Valid Percent	Cumulative Percent
Valid	strongly disagree	2	1.3	1.4	1.4
	disagree	5	3.3	3.5	4.9
	agree	68	45.3	47.2	52.1
	strongly agree	57	38.0	39.6	91.7
	neutral	12	8.0	8.3	100.0
	Total	144	96.0	100.0	
Missing	multiple choice	3	2.0		
	unknown	3	2.0		
		6	4.0		
total		150	100.0		

Statement 18 showed that 45.3% of the undergraduate students’ views are positive and agree that **Daily English listening makes their speaking Natural.**

Question 19: Listening to real conversations in English helps me think and respond.

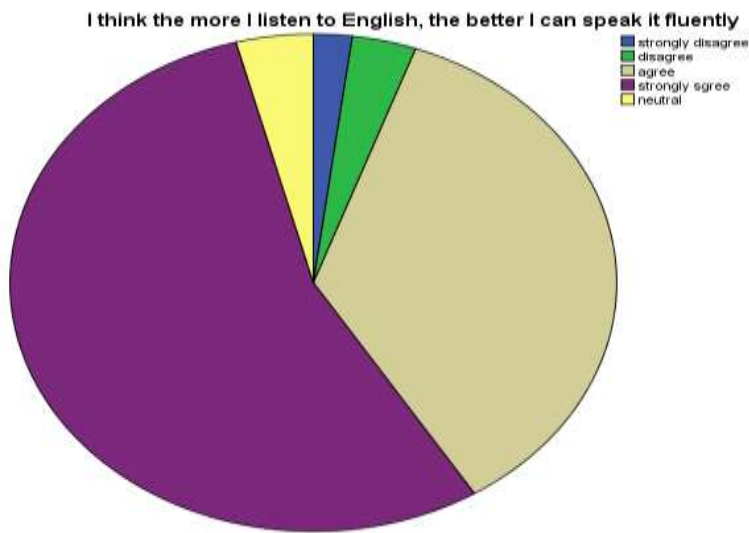

Listening to real conversations in English helps me think and respond					
		Frequency	Percent	Valid Percent	Cumulative Percent
Valid	disagree	13	8.7	9.0	9.0
	agree	62	41.3	43.1	52.1
	strongly agree	63	42.0	43.8	95.8
	neutral	6	4.0	4.2	100.0
	Total	144	96.0	100.0	
Missing	multiple choice	2	1.3		
	unknown	4	2.7		
	Total	6	4.0		
Total		150	100.0		

41.3% of the participants agreed that **listening to real conversations in English helps me think and respond**. And 42% Are strongly agree about this section.

Question 20: I think the more I listen to English, the better I can speak it fluently.

I think the more I listen to English, the better I can speak it fluently					
		Frequency	Percent	Valid Percent	Cumulative Percent
Valid	strongly disagree	3	2.0	2.1	2.1
	disagree	5	3.3	3.4	5.5
	agree	52	34.7	35.6	41.1
	strongly agree	80	53.3	54.8	95.9
	neutral	6	4.0	4.1	100.0
	Total	146	97.3	100.0	
Missing	multiple choice	1	.7		
	unknown	3	2.0		
	Total	4	2.7		
Total		150	100.0		

Nearly 34.7% of the students agreed that **more listen to English, speak better fluently** an about 53% of them strongly agreed about this section.

Discussion and Results

The findings of this study provide significant insights into the English language learning experiences of Afghan learners, particularly in Takhar province. A notable feature of the data is the overwhelming male dominance among participants, with 95.3% being male and a very small proportion being female. This demographic imbalance reflects the current socio-political realities in Afghanistan, where educational access for females, especially in rural areas, remains severely restricted. Such gender disparity not only limits female engagement but also underscores broader systemic barriers to inclusive language education.

Age-wise, the majority (43.3%) of participants were between 15–20 years old, indicating a strong interest in English language learning among the youth. Furthermore, the majority of participants' first language was Dari, with Dari speakers constituting 70.7% of respondents. This demonstrates a significant interest in learning English among Dari speakers.

One of the most prominent findings was the agreement that listening to podcasts helps individuals speak fluently on various topics. The majority of participants agreed with this idea. A combined 89% of participants agreed or strongly agreed that traveling to countries where English is the native tongue enhances fluency, and 90% endorsed listening to English

podcasts as an effective method to improve fluency and vocabulary.

According to the study, some findings align with previous research, such as the work of Griffiths (2008), Dawadi (2017), Alhaysony (2017), and Charoento (2017), which emphasize the role of listening to songs in improving English-speaking skills. Moreover, 82% of participants agreed or strongly agreed that listening is a vital skill among the four major language skills, consistent with research by Johnson (2021), who highlighted its importance.

Participants also highly valued various strategies for improving English fluency, such as listening more to improve speaking (88%), practicing English frequently to boost confidence (88.7%), listening to conversations with slang or idioms to enhance casual speaking (87.3%), and engaging in effective and enjoyable listening activities to improve fluency (86%). These findings reinforce the idea that listening to podcasts, songs, conversations, and interviews not only enhances speaking skills but also improves vocabulary and pronunciation.

The study faced several challenges and limitations. Firstly, the limited number of female participants was a significant limitation, driven by government restrictions preventing girls from accessing education. Secondly, the researchers had limited experience in conducting research, as most of them were school

students. Thirdly, identifying reliable participants was challenging due to limited resources. Finally, financial constraints and time limitations posed significant challenges, with many researchers facing financial difficulties and busy schedules. Additionally, the government laws restricting female students' access to education created obstacles in recruiting adequate participants. Future research should explore the importance of listening to American accents, using authentic resources, ensuring participant honesty, and securing financial support to address these challenges.

In conclusion, the study underscores the importance of listening as one of the most effective strategies for speaking English fluently among Afghan EFL learners. Integrating listening activities into daily life—such as podcasts, movies, conversations, and interviews—can significantly enhance speaking fluency in a natural and enjoyable manner. Encouraging young Afghan learners to pursue education and English language learning could transform the education system in Afghanistan and create better learning environments, particularly in remote provinces like Takhar, which may ultimately contribute to the future improvement of Afghanistan's education landscape.

Conclusion

English is a top priority for individuals who wish to communicate with others effectively, but learning a new language is not an easy task. Listening, in particular, plays a crucial role in mastering English. Language is often used to communicate across different countries and nationalities. However, there are certain challenges in becoming proficient in English. Listening is an active process that involves understanding what we hear. It is a skill that helps us comprehend information and form strong communication abilities. Improving listening skills requires daily practice and access to the best resources. Engaging with English audio materials, such as conversations and songs, helps learners understand accents and pronunciation.

Speaking English fluently is a fundamental aspect of language proficiency. listening is one of the four core language skills that foreign language learners must improve.

The findings of this study showed that most language learners were Dari speakers. Among the undergraduate participants, the majority expressed agreement or strong agreement with key statements regarding the role of listening in learning English.

The credibility of this study lies in its examination of the role of English listening in improving speaking fluency. It was conducted as experimental research within Takhar courses in

Afghanistan. However, the study faced several limitations. These included time constraints, a lack of participants, and a short duration for completing the research.

Questionnaire

The Role of English Listening on Speaking Fluency

Dear participant! Thank you from your participation. The questionnaire is prepared to find out the perception of EFL learner`s toward **The Role of English Listening on Speaking Fluency**. Your response will remain confidential and will only be used for research purposes. Please answer the question carefully and honestly.

Section 1: Participants Demographic Profile

Please check (√) the most suitable answer.

- 1) Gender Male ☐ Female ☐
- 2) Age group 10-15☐ 15-20☐ 20-22☐ 25-30☐ 30+☐
- 3) First language Dari☐ Pashto☐ Uzbek☐ other☐

Section 2: The Role of English Listening on Speaking Fluency.

To what measure do you agree or disagree with the following statement. Please read the statements below carefully, you have five choices, after reading the statements, you can choose only one of them.

1: Strongly disagree 2: Disagree 3: Agree 4: Strongly agree 5: Neutral

Tick (✓) only one option for each item in the questionnaire.

No	Statement	Scale				
The Role of English Listening on Speaking Fluency		SD	D	A	SA	N
1	Listening to podcasts help me speak fluently on different topics.					
2	Listening to different English accents help me speak better in various situation.					
3	Travel to countries that their native tongue is English help me speak fluently.					
4	Listening to English songs help me to develop and improve my speaking.					
5	Effective and enjoyable listening will affect my speaking fluency.					
6	Technology plays an important role in my speaking fluency.					
7	In my view listening skill is a vital skill to be acquired among the four major skills.					
8	I think watching interviews with deferent people improve my understanding in speaking.					
9	In my view listening to English conversation with slang or idioms help me to become more fluent in casual speaking.					
10	I think listening my English content focused on vocabulary improves my fluency in using words and phrases in speaking.					
11	Listening to audiobooks my words stronger and improves speaking.					

12	Too much practice in English will increase my confidence in speaking English.

14	Listening to English in very crowded environments increase my speaking.					
15	In my view listening to English videos plays an important role in raising the side of speaking than reading a book.					
16	The use of internet plays an important role in improving my speaking.					
17	I think listening and speaking are related to each other.					
18	Daily English listening makes my speaking natural.					
19	Listening to real conversation in English helps me think and respond.					
20	I think, the more I listen to English, the better I can speak it fluently.					

پرسشنامه

نقش شنیداری انگلیسی بالای روان صحبت کردن انگلیسی

اشتراک کننده عزیز! تشکر از مشارکت شما. این پرسشنامه در مورد نقش شنیداری انگلیسی بالای روان صحبت کردن زبان آموزان انگلیسی تهیه شده است. پاسخ شما محرمانه خواهد ماند و فقط برای اهداف تحقیق استفاده می گردد. لطفا سوالات را با دقت و صادقانه جواب دهید.

بخش اول: مشخصات فردی شرکت کننده ها

لطفا مناسب ترین پاسخ را انتخاب کنید.

- (1) جنسیت ☐ مرد ☐ زن
- (2) گروه سنی ☐ ۱۵-۱۰ ☐ ۲۵-۲۰ ☐ ۳۰-۲۵ ☐ ۳۰+
- (3) زبان اول ☐ دری ☐ پشتو ☐ ازبیک ☐ دیگر ☐

بخش دوم: نقش شنیداری انگلیسی بالای روان صحبت کردن انگلیسی

با چی میزانی با عبارات ذیل موافق و یا مخالف هستید. لطفا بیانییه های ذیل را با دقت بخوانید و پنج انتخاب دارید. بعد از خواندن بیانییه شما میتواند تنها یکی از انها را انتخاب کنید.

1: کاملاً مخالف	2: مخالف	3: کاملاً موافق	4: موافق	5: بی طرف
-----------------	----------	-----------------	----------	-----------

برای هر بخش در پرسشنامه فقط یک گزینه را انتخاب کنید.

مقیاس					بیانیه ها	نمبر
بی طرف	کامل مخالف	مخالف	کامل موافق	موافق	نقش شنیداری انگلیسی بالای روان صحبت کردن انگلیسی	
					1 گوش کردن به برنامه های شنیداری مانند (پادکست) به من کمک میکند در موضوعات مختلف روان صحبت کنم.	
					2 گوش کردن به لهجه های مختلف انگلیسی برایم کمک میکند در موقعیت های مختلف بهتر صحبت کنم.	
					3 گوش کردن به آهنگ های انگلیسی به من کمک میکند تا مهارت گفتاری خود را تقویت کنم.	
					4 سفر کردن به کشور های زبان انگلیسی به من کمک میکند تا بهتر صحبت کنم.	
					5 گوش کردن موثر و لذت بخش به روان صحبت کردن من تاثیر میگذارد.	
					6 به نظر من گوش دادن یک مهارت حیاتی است که باید در میان چهار مهارت اصلی دگر فرا گرفته شود.	
					7 تکنولوژی نقش مهم را در روان صحبت کردن من بازی میکند.	
					8 من فکر میکنم تماشای مصاحبه ها با افراد مختلف درک من را در مهارت گفتاری بهبود میبخشد.	
					9 به نظر من گوش دادن به مکالمات انگلیسی که شامل اصطلاحات و زبان محاوره ای هستند باعث میشود در مکالمات روزمره روانتر صحبت کنیم.	

				10	من فکر میکنم گوش دادن به محتوای انگلیسی که به واژگان من تمرکز دارد روان صحبت کردن من را در استفاده از کلمات و عبارات بهبود میبخشد.
				11	گوش دادن به کتاب های صوتی لغات من را تقویت کرده و مهارت گفتاری من را بهبود می بخشد.
				12	تمرین زیاد انگلیسی اعتماد به نفس من را در صحبت کردن افزایش میدهد.
				13	تماشای فیلم های انگلیسی با زیرنویس فارسی درک من را در گفتار انگلیسی کمک میکند.
				14	گوش دادن به انگلیسی در محیط های شلوغ باعث افزایش مهارت گفتاری من میشود.
				15	به نظر من تماشای ویدیوهای انگلیسی بر بهبود گفتاری من نسبت به خواندن کتاب تأثیر بیشتری دارد.
				16	استفاده از انترنیت نقش مهمی در بهبود مهارت گفتاری من دارد.
				17	من فکر میکنم مهارت شنیداری و گفتاری با هم ارتباط دارند.
				18	شنیداری انگلیسی روزمره باعث میشود صحبت کردن من طبیعی تر میشود.
				19	شنیدن مکالمات واقعی انگلیسی به من کمک میکند که فکر کنم و پاسخ دهم.

					من فکر میکنم هر چی بیشتر به انگلیسی گوش دهم به همان اندازه روان صحبت میکنم.	20
